

## INTEGRATED INFRASTRUCTURES & PROCESSES

### ACTION CLUSTER MEETING

#### Meeting Details

<b>Date &amp; time</b>	18 November 2021, 09:30-11:00 CET
<b>Location</b>	Online, connection details upon registration
<b>Organizer</b>	Steinbeis

#### Purpose

The meeting builds on:

- the landscape of a clearly recognised need for far better joined-up pan-city data management that Covid has highlighted;
- the extensive work of the Smart City Lighthouse programmes to implement Urban Data Platforms;
- a legacy of SCM actions and deliverables on UDPs;
- and the more recent Living-in.EU initiative;

The purpose of the meeting is to understand what the Smart Cities Marketplace community can do to help lift momentum for adoption of common effective Urban Data Platforms across EU cities (to meet our goal of serving 250mIn EU citizens in cities with UDPs by 2025).

#### Agenda
