european  
energy award

# The European Energy Award

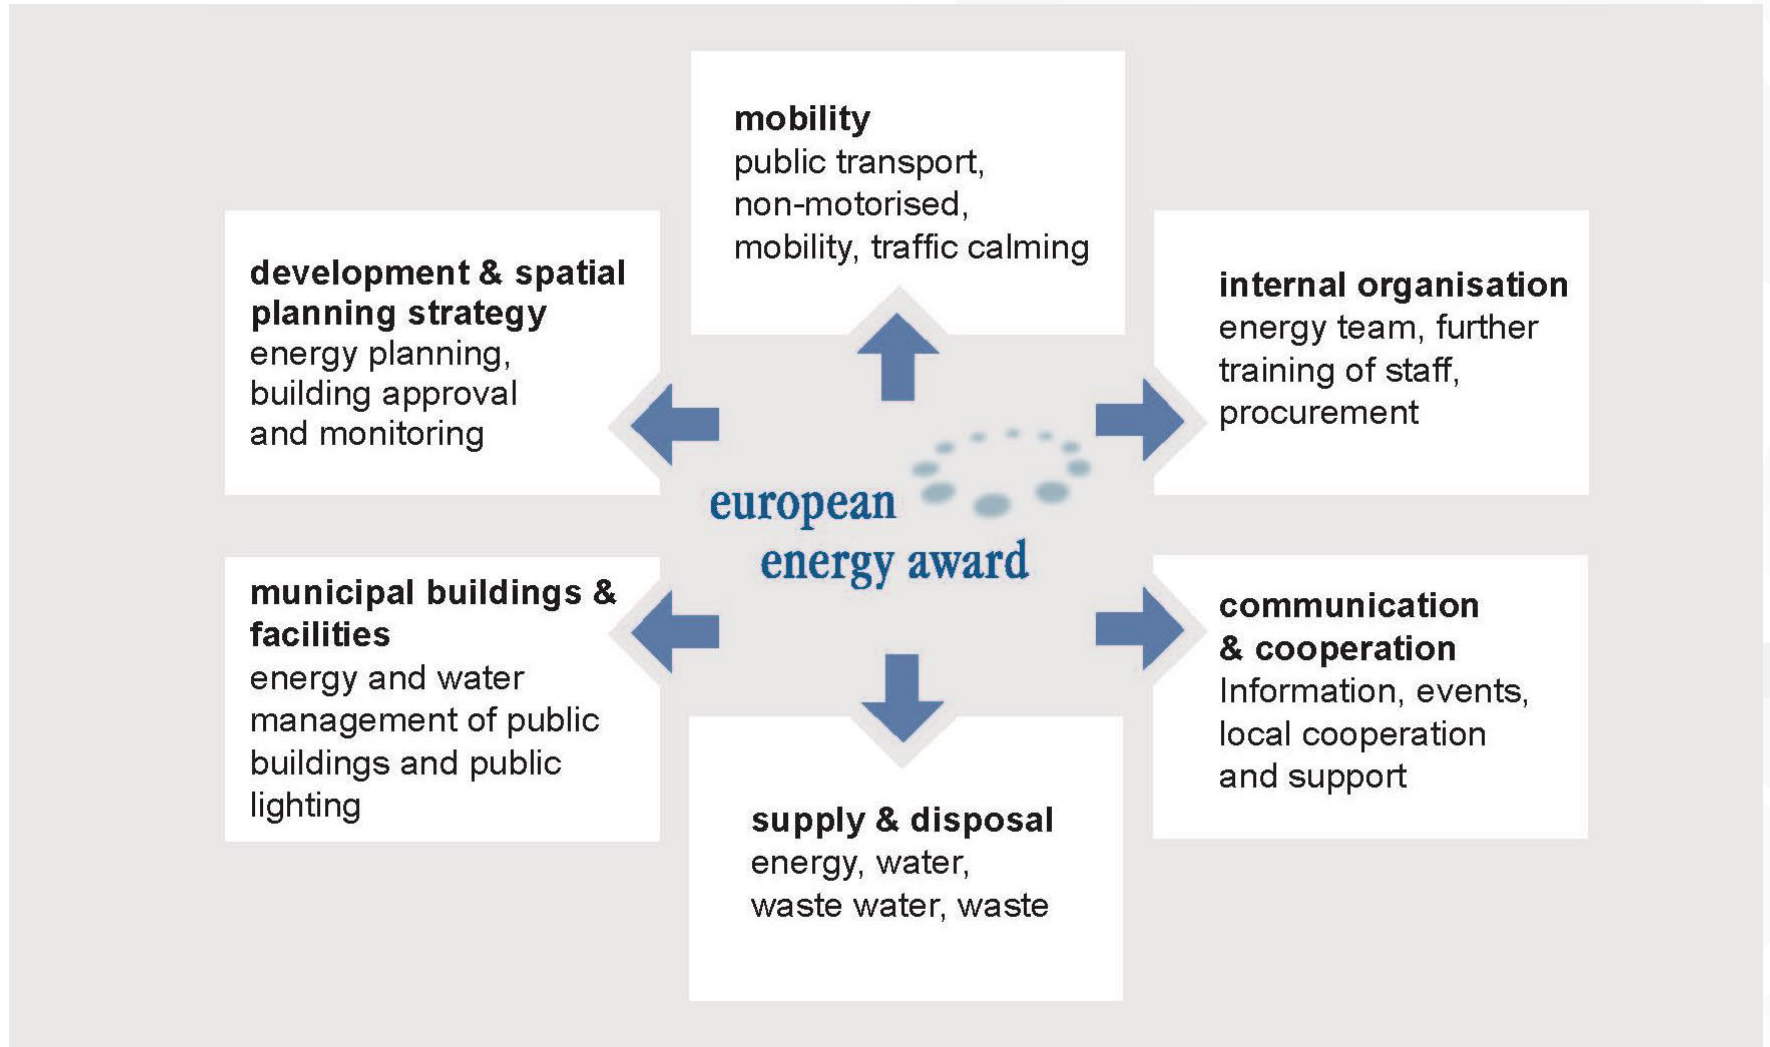

Defining short-, midterm  
and long term goals

# The European Energy Award

- **Quality management system for communal energy and climate policy**
- **Certification & awarding system**
- **International benchmarking system**
- **National/regional support programmes for communities**

# The European Energy Award

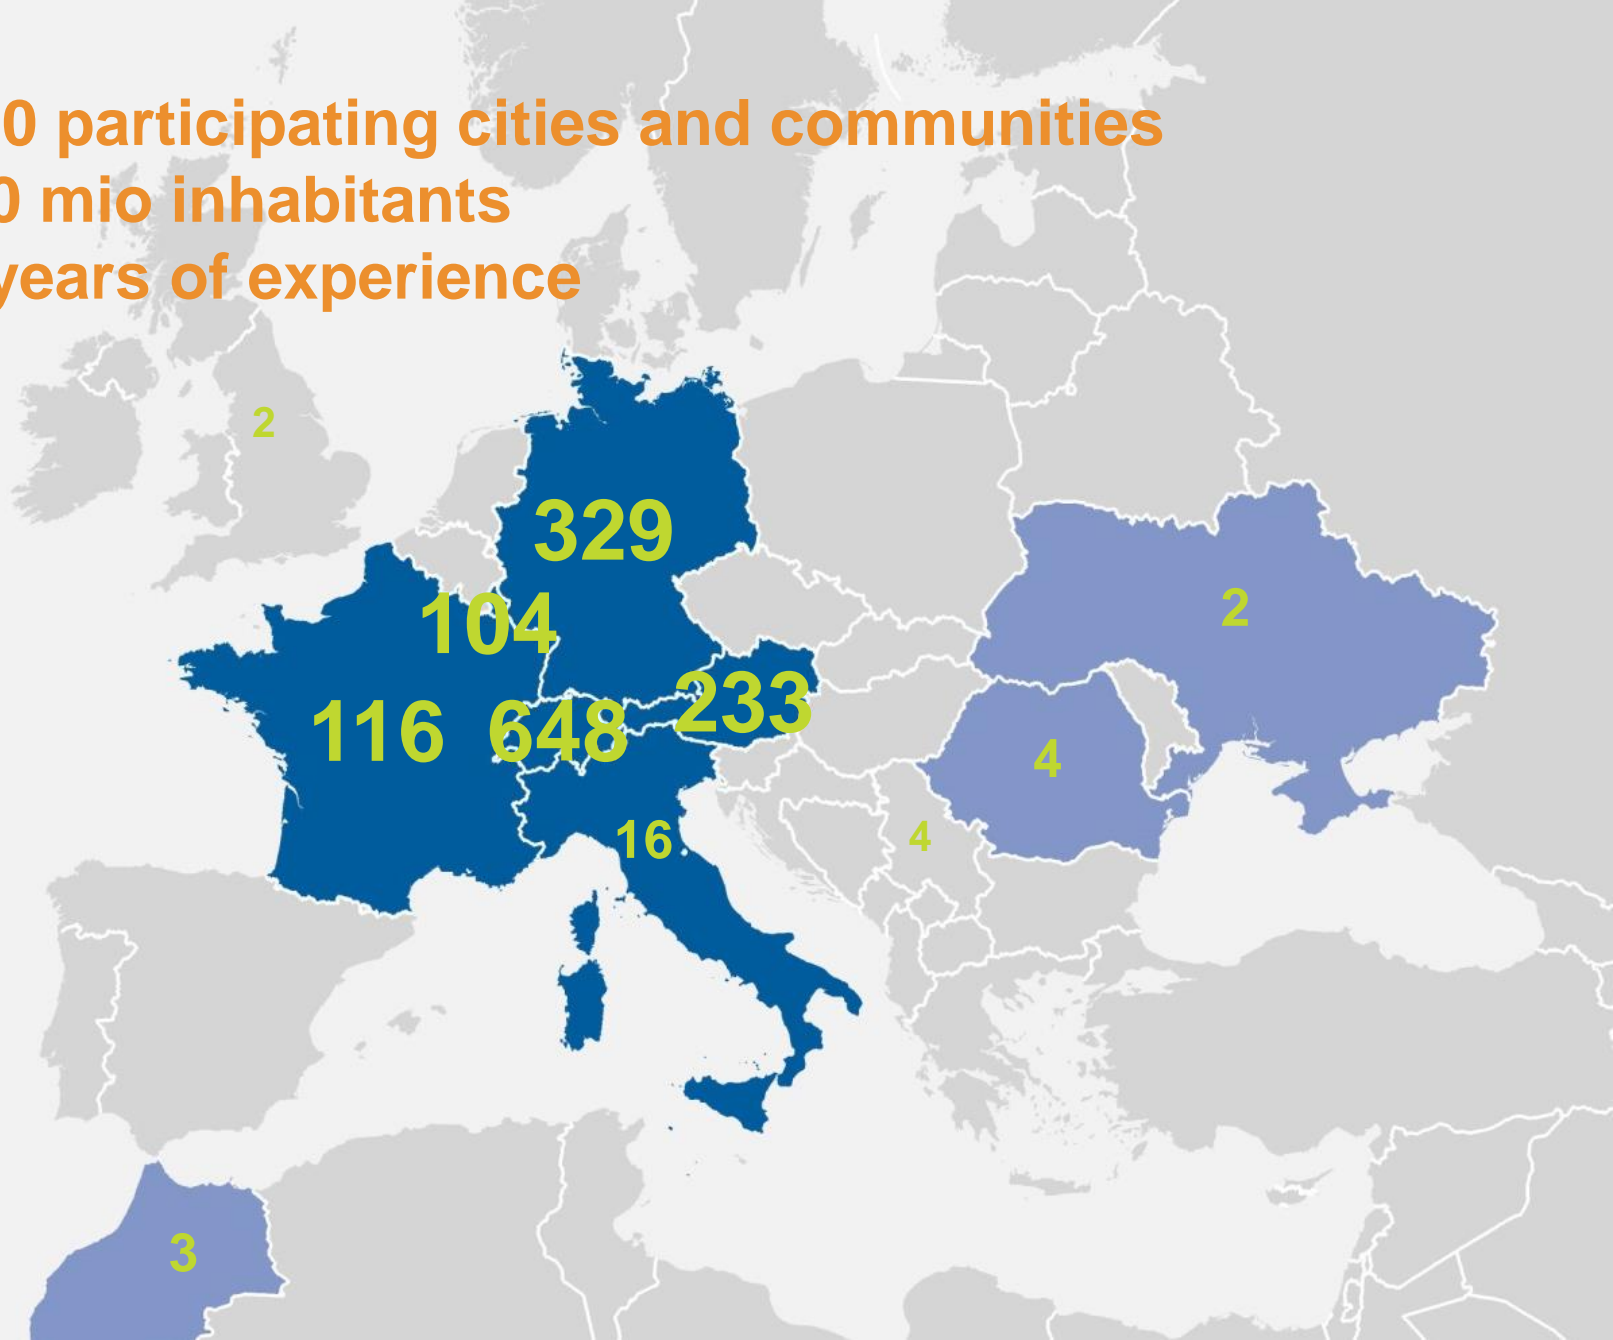

# The European Energy Award

- **6 areas of assessment > holistic approach**
- **73 qualitative indicators (assessment between 0 – 100%) and set of quantitative indicators > mix of different types of KPIs**
- **No must indicators > strong incentives through benchmarking to use certain indicators**

**1500 participating cities and communities**  
**~ 50 mio inhabitants**  
**25 years of experience**

Overseas Territories  
(France)

# Alignment with UN SDG11 / U4SSC

- Similar indicator for majority of UN SDG 11 indicators
- Classification according to U4SSC possible, sometime several categories applicable
- eea focusses on energy and climate policy (environment), BUT this implies certain co-benefits or co-responsibilities from societal or economic point of view

# Conclusions / recommendations

- Cities and communities need guidance through all the different initiatives, need to see synergies, no double work
- Cities and communities need to have a benefit of public reporting / communication of indicators in the long-term
- Coach / accompany cities and communities
